New QR Code Gives Easy Access to Mason Transit Schedules, Maps

SHELTON, WA—Mason Transit Authority customers now have new way to find bus schedules and maps by using smartphones to scan QR codes posted on buses, in bus stop shelters and eventually on bus stop signs along routes.

“The QR code makes it easier for people to get information. The code quickly takes you to route information, saving the time and frustration of online searching,” said Amy Asher, Mason Transit general manager.

To read a QR code, simply open the camera on your smartphone and hold the phone steady for a few seconds. The camera reads the QR code and prompts you to click on a web link. Older phones may require you to download a QR code reader from an app store.

The new QR code is clearly identified with the Mason Transit Authority logo.

Mason Transit Authority serves the Mason County community and connects with area transit systems including Grays Harbor Transit, Intercity Transit (Thurston County), Jefferson Transit, Kitsap Transit, Squaxin Island Transit and Sound Transit, which in turn provides connections to the ferries, Amtrak and Greyhound service. ***You can go anywhere from here!*** *Mason Transit Authority is a partner in the Health & Safety Commitments Program of The American Public Transportation Association.*
